(740) 817-3669

7+ years of experience in software development and QA engineering. 3+ years as a Full-stack developer. Well-practiced in working with UI/UX design teams to efficiently build elegant product feature sets, exceptionally clean code, and great user experience. Continuously strengthening capabilities across several technologies and languages, including Angular, TypeScript, C#, and ServiceNow. Highly effective team player and mentor to other engineers.

Professional Experience

Capital One Discover Financial Services, Remote Senior Associate ServiceNow Application Engineer - Developed and maintained scalable, secure ServiceNow applications, including custom JavaScript and AngularJS features for ITSM and HR modules, ensuring alignment with business objectives and regulatory compliance. - Enhanced application performance and security through code optimization and integration with REST APIs. - Collaborated daily with cross-functional teams and clients to gather requirements, test implementations, and deliver tailored solutions, improving user satisfaction and operational efficiency. - Mentored Junior engineers and provided training on developer best practices, agile methodologies, and fostering team growth.	May 2025 – Present
Experlogix Inc. South Jordan, Utah Full-stack Software Engineer Full-stack developer and QA engineer of a leading Customer Relationship & Price Quote SAS tool that integrates with CRM and ERP systems, including Microsoft Dynamics and Salesforce, to provide more optimized pricing for products and services. I have developed new features and improved existing functionalities, including building back-end wiring, application logic, and user interfaces. - Redesigned and rebuilt the Help system of our application using TypeScript and Angular, with a focus on improving accessibility and enhancing the overall user experience - Enhanced several C# based APIs and our databases to improve notifications and logging systems in the UI. - Collaborated closely with the design team to develop over 70 new features based on modern UI design patterns, enabling users to configure their products and import data easily. - Designed and created a reusable “Snack bar” or “Toast” component with multiple configurations, including change discard confirmation, error reporting, and progress updates.	Jan 2022 – Apr 2025
Experlogix Inc. South Jordan, Utah Software Quality Assurance Engineer I created over 300 Selenium automation tests to ensure quality for desktop and cloud applications integrated with Salesforce, NetSuite, and MSCRM. I improved the test suite’s multi-branch testing and speed, shortening development cycles, and manually tested ~50 releases for robust functionality and deployment.	Feb 2019 – Jan 2022

Education

Bachelor's Degree in Computer Science, Utah Valley University, Orem, Utah	Apr 2022
--	----------

Key Skills

C#	CSS	ServiceNow
Angular	SCSS	Jest
TypeScript	HTML	Unit Testing
JavaScript	GIT	Quality Assurance
UI UX	SQL	Agile Methodologies
